OUR VISSION

OUR SERVICES

1. Electrical work
2. Fire fighting work
3. Plumbing work
4. Hvac ducting work
5. Steel Fabrication
6. Cooling Tower System
7. Steel Pipe Fabrication & Piping
8. Electrical
9. Lighting

1. Industrial Services
2. Painting & Coating
3. FRP & RTR Piping
4. Isulation
5. HVAC Equipments and accessories
6. Industrial Safety & Security
7. Switches & Circuit breaker

Our workforce is highly trained, experienced and committed to providing a superior and competitive service to our clients' ensuring that the job is completed on time and within budget, and meeting or exceeding their quality requirements.

ELECTRICAL works

We provide expertise in all facets of E&I construction work. Our internationally experienced personnel, established procedures and proven construction management systems guarantee a SAFE, efficient and reliable result on all our projects.

We possess all the necessary plant, equipment, tools and test equipment to safely assemble, install and test the following electrical and instrumentation systems and components

- HV/MV Power and Distribution Systems
- Hazardous Area Installations
- Communications Systems (Telephone, Radio, Mobile, Wireless)
- Fire Detection, Alarm & Suppression
- Lighting Systems (Exterior, Interior, Emergency, Smart, Dimming)

Fire fighting work

Firefighting is a profession aimed at controlling and extinguishing fire. A person who engages in firefighting is known as a firefighter or fireman. Firefighters typically undergo a high degree of technical training. This involves structural firefighting and wildland firefighting.

Firefighting is a profession aimed at controlling and extinguishing fire. A person who engages in firefighting is known as a firefighter or fireman.

Firefighting is the act of attempting to prevent the spread of and extinguish significant unwanted fires in buildings, vehicles, woodlands, etc. A firefighter suppresses fires and performs rescues to protect lives, property and the environment.

Plumbing work

The plumbing system in your home is made up of two different systems. One that brings clean, fresh water in and another (the drainage system) takes the waste water back out again. The water coming into your home is already pressurised which forces it to travel in straight line

The plumbing system in your home is made up of two different systems. One that brings clean, fresh water in and another (the drainage system) takes the waste water back out again.

When you look for an industrial painter to re-coat the machinery, ceiling, floor, walls or exterior of your facility, you need the project to be completed efficiently, but with attention to detail. Unplanned downtime equals lost profitability.

Hvac ducting work

An air duct is a fundamental component of your home's HVAC system. It is a conduit for conditioned air, whether heated or cooled, to circulate throughout your living spaces. Think of it as the intricate network of pathways that ensure the comfortable temperature you enjoy in every room.

An air duct is a fundamental component of your home's HVAC system. It is a conduit for conditioned air, whether heated or cooled, to circulate throughout your living spaces

Ductwork is a system of ducts that gives and takes air from a building. It can be used in commercial and living spaces too. The essence of a duct system is to keep the air in a building clean, free of germs, and of course, breathable. The ducted systems work by extracting hot air from the room to cool it.

FRP & RTR FABRICATION & PIPING

It's a fact now that FRP inherited advantages over conventional materials such as steel and concrete are well known to the engineering community, clients and contractors. For easy reference find below some of these advantages

From our division in mechanical field work FRP, RTR Steel piping include fabrication, jointing alignment, fitting and hydro test with all civil works needs

Plumbing uses pipes, valves, plumbing fixtures, tanks, and other apparatuses to convey fluids. Heating and cooling (HVAC), waste removal, and potable water delivery are among the most common uses for plumbing, but it is not limited to these applications.
